ACTIVITIES

Lawrence Freestate Highschool Robotics- Team Steam

Position: programmer/builder/pit crew/ head of team relations

- partially helped program my team's robot
- my partner and I came up with our robot's design
- set up many trials to identify weaknesses and problems with our robot, surveyed and tested each one to come up with a proper solution without jeopardizing any of our robots strength
- robot placed 1st individually and 2nd as a team In the 2016 FIRST robotics competition

RELEVANT COURSEWORK:

- Conducted trials to gather data on why the subject and my/my teams ideas are the right choice compared to competition
- Participated in bootcamps and classes to strengthen my presentations and logical thinking/critique

SKILLS

Can program in:

- Javascript
- HTML/CSS
- Node
- Java
- Firebase

STRENGTHS

- can adjust to fast pace changes
- Constantly trying to improve myself, I will always ask questions, challenge myself, and try to remain a reliable asset that can be depended on
- Will independently learn from outside sources to solve solutions to a current problem
- Willing to learn different programming languages/algorithms and skills at a reasonable pace to accomplish any upcoming task
- Bilingual with Arabic and English, can understand most French
